

ID	CS001245	Creation date	December 18, 2008
Platform	S60 5th Edition	Tested on devices	Nokia 5800 XpressMusic
Category	Web Runtime (WRT)	Subcategory	Multimedia

Keywords (APIs, classes, methods, functions): device.getServiceObject(), Service.MediaManagement.GetList()

Overview

This code snippet shows how to asynchronously get a list of images using the Media Management Platform Service for Web Runtime introduced in S60 5th Edition.

To obtain access to the service object for the Media Management Service API, the `device.getServiceObject("Service.MediaManagement", "IDataSource")` method is used.

```
//Setting file criteria.
var criteria = new Object();
criteria.Type = "FileInfo";
criteria.Filter = new Object();
criteria.Filter.FileType = "Image";
criteria.Sort = new Object();
criteria.Sort.Key = "FileSize";
//Asynchronous function for fetching files.
result =
    multimediaServiceObject.IDataSource.GetList(criteria, callback);
} catch( exception ) {
    alert("initialize error: " + exception);
}
}

/**
 * A callback function used to handle results of fetching multimedia files.
 * @param transId A number representing the transaction that called the
 * callback
 * @param eventCode A number representing the callback return status
 * @param result An object for holding the callback return value
 */
function callback(transId, eventCode, result) {
    if(result.ErrorCode != 0) {
        alert("Error in creating file list:" + result.ErrorCode);
        return;
    }
    createFileList(result.ReturnValue);
    document.getElementById("imageList").options[0].focus();
}

/**
 * Creates a list item for every multimedia file in "iterator".
 * @param iterator The list of files
 */
function createFileList(iterator) {
    var imageList = document.getElementById("imageList");
    //Reset to set pointer to the first element.
    iterator.reset();
    var item;
    //Cleaning the file list.
    while (imageList.length != 0) {
        imageList.remove(0);
    }

    while ((item = iterator.getNext()) != undefined) {
        var node = document.createElement("option");
        //Value of option consists of the full path.
        node.value = item.FileNameAndPath;
        node.appendChild(document.createTextNode(item.FileName +
            item.FileExtension));
        imageList.appendChild(node);
    }
}

/**
 * Shows the selected image.
 */
function show() {
    var imageList = document.getElementById("imageList");
    for(var i = 0; i < imageList.options.length; i++) {
        if (imageList.options[i].selected) {
```

CS001245_-_Loading_images_in_WRT

```
document.getElementById("imageShow").src =  
    imageUrl.options[i].value;  
    }  
    }  
}
```

Postconditions

- When the snippet is started, all available image names are loaded into the list box.
- When clicking on the image name, the image content is loaded and displayed.
