

ID	CS001257	Creation date	December 19, 2008
Platform	S60 5th Edition	Tested on devices	Nokia 5800 XpressMusic
Category	Flash Lite	Subcategory	Application framework

Keywords (APIs, classes, methods, functions): Service.AppManager, appManager.GetList()

Overview

This code snippet demonstrates how to list all installed applications using the Application Manager Platform Service for Flash Lite, supported from S60 5th Edition onwards.

Source

```
// Import Platform Service Interface
import com.nokia.lib.Service;

// Heading of the application
heading_txt.text = "List of applications";

// Create a new Service object which has Application manager data
var appManager = new Service("Service.AppManager", "IAppManager");

// Define input parameters
var inParams = {Type:"Application"};

// Define result value
var outParams = appManager.GetList(inParams);
if (outParams.ErrorCode == 0) {
// go through all applications and trace captions to the textarea
var outList = outParams.ReturnValue;
var outputEntry = null;
do {
    outputEntry = nextListItem();
    if (null != outputEntry) {
        var caption = outputEntry.Caption;
        text += text + caption + "\r";
    } else {
        break;
    }
} while (true);
} else {
```

CS001257_- _Listing_installed_applications_in_Flash_Lite

```
var errorId = outParams.ErrorCode;
    texttt.*.Error: "+errorId;
}
```

Postconditions

Captions of all installed applications are displayed.

Example application

The following sample application has been tested in Nokia 5800 XpressMusic (S60 5th Edition, Flash Lite 3.0).
