

## Main Topic Areas

- [Symbian C++](#)
- [Open C](#)
- [Java](#)
- [Python](#)
- [Flash Lite](#)
- [WRT Widgets \(Web Runtime\)](#)

You should use the category "Code Examples" to indicate that the article contains mainly usable code snippets. If the article describes a process, and includes code to illustrate a point - it should be categorized as a "How To".

**NEW!** We have recently added a **code snippets table** that lists common mobile application use cases with links to corresponding Forum Nokia code snippets. This way developers can now more easily find snippets in different programming languages and runtimes.

[Template for creating code snippets](#) - Copy and paste to create a new page.

---

We currently have 2060 Code Examples in this Wiki.
