This page contains Known Issues and Solutions contributed by Developers

Forum Nokia want to encourage developers to report new and specify already reported known issues - and provide solutions. These may be migrated through our technical support - and officially verified.

Please use the template KBDC when submitting known issues and technical solutions.

An example page can be found [here](#). Cut and paste to create new pages.

If you want to report bugs non-publicly, including customer confidential information, or place a feature request, use the [Forum Nokia Feedback Channel](#) to protect your project's privacy.
