

This is the Wiki page for FNA CodeCamp WRT.

We had (okay at least I did) a wonderful time coding, talking, and demoing widgets running on S60 WRT environment. Developers new to WRT had learned about the S60 3.2 SDK and had made simple changes to example widgets. Developers who were familiar with WRT had shown off their applications!

If you have an idea you want to work on and if you want to work with others, enter/edit it in the ideas section below. You can also comment or ask questions about the event in the "comment" section. We will response the questions there.

- In order to edit or comment, you do need a Forum Nokia account.
- In order to get the latest update, select "watch" on this page. If you want, you can enable email notification when this page is updated in "My Preferences" account section.

Information (Read-only for participants):

When: Marh 25th 2008

Where: Nokia Office, 313 Fairchild Drive, Mountain View, California 94043

What to bring: Laptop with S60 3rd FP2 SDK installed, and your ideas.

Preparation:

- Please download and install the following tools prior to the code camp:

S60 3rd FP2 SDK, emulator for testing (Mandatory) [link](#)
ActivePerl is required in order to install and run S60 3rd FP2 SDK. [link](#)

Information (Read-only for participants):

- Check out the Forum Nokia resources for WRT:

Web Run-Time API Reference [link](#)
Getting Stated package [link](#)
Forum Nokia Wiki Web-Runtime resources [link](#)
Demonstration Movie [link](#)

Agenda

<https://mktools.forum.nokia.com/invitation?action=showEvent&mode=agenda>

Forum Nokia Code Camp Competition

http://www.forum.nokia.com/main/contests/global_application_contest.html

Technology in the Spotlight - Web Runtime

http://www.forum.nokia.com/main/resources/technologies/technology_in_the_spotlight.html

Intro. -Ideas, Work in group, level of coding.

Throughout the day, you can have the open floor for demo or presentation.

Tools: If you have not installed the tools, take the CD and copy to your laptop.

Throughout the day, we will have short presentations of Widget API

Music

Competition/Prizes: We will give out prizes at the end of the day!

- Best Widget will get phones: N95 US
- Drawing
- Enter your ideas in the following section.

Ideas/Teams (Read/Write for participants):

(I hope I got the developer names right. If not, anyone at the event please correct me.)

Philippe Furlan's "My Location" widget

Sean Voss's "Scrabble Test"

Kevin Leong demoing his web application:
