

## Introduction

Forum Nokia Virtual Developer Lab (VDL) is a remote testing service powered by DeviceAnywhere that allows developers to test their applications on various Nokia S40 and S60 handsets.

Key functions of the service include:

- **Remote access to real handsets in live networks**
- **Test collaboration colleagues**
- **Test interaction between multiple devices**
- **Saving all results through screenshots/videos for later review**
- **Test automation**
- **QoS monitoring**

The service is fee based, but there is a free trial. For further details refer to DeviceAnywhere's website.
