Keywords (APIs, classes, methods, functions): e32

Overview

S60 phones use cooperative multitasking. You call `e32.ao_yield()` here and there to let other tasks run before they return back to you. `e32.ao_lock()` also plays a role when you wait for callback.

Code

```
import e32    #import module
from SomeBigLibrary import * # takes a very long time !

e32.ao_yield()
# your codes follow
```
