

How_to_use_http_to_send_soap_request

In S60 3rd Edition and later SDKs, a full framework for web services is provided, allowing simplified access to SOAP services. http://www.forum.nokia.com/main/resources/technologies/web_services/index.html

You can use http to send SOAP request and use your XML parser to SOAP messages.

```
_LIT8(KSoapAction, "SoapAction");
_LIT8(KSoapActionParam, "http://soaptest.org/method");

RStringF action = iSession.StringPool().OpenFStringL(KSoapAction);
CleanupClosePushL(action);

RStringF param = iSession.StringPool().OpenFStringL(KSoapActionParam);
CleanupClosePushL(param);

RHTTPHeaders headers = iTransaction.Request().GetHeaderCollection();

THTTPHdrVal stringVal(param);
headers.SetFieldL(action, stringVal);
```
