Description

RTSP streaming URLs that do not contain a file extension are not supported. If such a URL is used, then `Manager.createPlayer()` call throws a `MediaException`.

For example, the following kind of URL does not work:

- * `rtsp://somedomain/stream_name`

While following kinds of URLs would work:

- * `rtsp://somedomain/stream_name.rm`

- * `rtsp://somedomain/stream_name.3gp`
