

ID	KIJ001376	Creation date	June 12, 2009
Platform	S60 5th Edition	Devices	Nokia 5800 XpressMusic
Category	Java ME	Subcategory	UI

Keywords (APIs, classes, methods, functions): Canvas

Description

If the device uses a network connection, a network indicator is always displayed in the top-left corner of the display.

However, in S60 5th Edition, the network indicator is not shown at all if the Java application being displayed uses a full-screen Canvas.

How to reproduce

1. Implement a test MIDlet by using, for instance, this example: [File:NormalCanvasTest.zip](#).
2. Using the defined example, launch the test MIDlet and select **Full Canvas**. On the affected devices, the network indicator does not appear in the top-left corner of the display.
3. For comparison, select the **Normal Canvas** option. The network indicator appears correctly in the top-left corner.

Solution

This issue is expected to be fixed in future software versions, starting from S60 5th Edition.
