## Overview

E-mail accounts created using the `CEmailAccounts` class in S60 3rd Edition, FP1 are not visible in the messaging application.

## Description

The e-mail accounts created using the `CEmailAccounts` class are not listed in the messaging application because some additional setting attributes need to be set. S60 mailbox handling has changed in S60 3rd Edition, FP1.

## Solution

E-mail account creation in has changed in S60 3rd Edition, FP1 and some additional settings need to be done using internal APIs. To apply for the internal API to fulfill the required feature, you need to create an API partnering request. For more information about purchasing the ticket, see [the Forum Nokia Technical Support Web site](#).
