## Description

In S60 5th Edition devices, if the Browser Control interface is used to load any web page with maps, the application freezes for a few minutes while loading the page. This issue cannot be reproduced on S60 3rd Edition devices.

## How to reproduce

Load any web page with maps, such as maps.yahoo.com or maps.google.com, using the Browser Control interface. The **BrCtlSampleApp** example available in the SDK can be used for this purpose. While loading the page, the application freezes for over 3 minutes before displaying the content. The same application works fine in all 3rd Edition devices.

## Solution

No known solution. This issue is under investigation.
