

**Note!**

This API is not part of the public SDK. It can be found in the [SDK API Plug-in](#).

The Logs Client API can be used to launch Logs view, missed calls view and dialled calls view.

Use cases

In an application, where it is needed to know missed calls without closing the application.

Example code

Header files:

```
#include <CLogsClient.h>
```

Link against:

```
LIBRARY logsclient.lib
```

To launch Logs view, Dialled calls and Missed view:

```
// Instantiate CLogsClient class
CLogsClient* iLogsClient= CLogsClient::NewL();

// Launches Main Logs view
iLogsClient->StartLogsL(MLogsAppStarter::EAppListView);

// Launches Dialled calls view
iLogsClient->StartLogsL(MLogsAppStarter::EDialledCallsView);

// Launches Missed calls view
iLogsClient->StartLogsL(MLogsAppStarter::EMissedCallsView);
```
