

PIN - Personal Identity Number

PIN (Personal Identity Number) is a 4-8 digit access code which can be used to secure your telephone from use.

PIN2 (Personal Identity Number 2) is a 4-8 digit access code which can be used to access the priority number memory and cost of calls.

The **PUK (Personal Unblocking Key)** and PUK2 are used to unlock the PIN and PIN 2 codes respectively if your SIM card is blocked.
