

SVG_Profiles

SVG profiles are subsets of SVG specification. It is usually because limitations of target devices where the SVG is used.

For mobile devices there are following profiles:

- **◆ SVG Tiny (SVGT) or SVG Tiny 1.1**

SVG Tiny does not support gradients, transparency, clipping, masks, symbols, or SVG filter effects.

- **◆ SVG Tiny 1.1 plus :-**

SVG Tiny 1.1 Plus includes the ability to display gradients and transparency, but does not support clipping, masks, symbols, or SVG filter effects.

- **◆ SVG Tiny 1.2 or SVG Basic (SVGB)**

SVG Basic does not support nonrectangular clipping or some SVG filter effects.
