

ID	...	Creation date	June 15, 2009
Platform	S60 3rd Edition, FP1, FP2 S60 5th Edition	Tested on devices	Nokia N79
Category	Qt for Symbian	Subcategory	UI

Keywords (APIs, classes, methods, functions): QToolTip::showText()

Overview

This code snippets shows how to show tool tips in widget. The QToolTip class provides tool tips (balloon help) for any widget. The tip is a short piece of text reminding the user of the widget's function. It is drawn immediately below the given position in a distinctive black-on-yellow color combination. The class QToolTip has static method showText(), which shows tool tips at given position.

This snippet can be self-signed. As it does not use any API which require developer/certified signing.

Preconditions

- Download and Install latest version [Qt for Symbian - Installation packages](#) which has links on how to install the latest version

Headers required

```
#include <QToolTip>
```

Source

```
int main(int argc, char *argv[])
{
    QApplication a(argc, argv);
    ToolTip w;
    w.show();

    //Set string that you want to show in tooltip.
    QString "samlagh sangani";

    //Set position of tooltip
    QPoint(100, 100);

    //Call method showText() of QToolTip to show tooltip.
    QToolTip::showText(pos, string);
}
```

```
    return a.exec();  
}
```

Postconditions

The code snippet is expected to show tool tips at given position..
