

Hi I just wonder what kind of program should I download to be able to have or establish a connectivity between my NOKIA N73 and my new computer In UBUNTU 8.04 in LINUX X86? with of course GNU. I cannot download either NOKIA PC SUITE with WINEhq in UBUNTU/LINUX which is an emulation program for to be able to download windows based platformproducts!! So now I cannot have or get any pc-suite! no Blue-tooth, no IR,no computer-cabel CA53 to my computer because I cannot install these at all???? WHY IS THAT???? WHAT SHALL I DO NOW???DO I NEED TO BUY A NEW MOBILE PHONE???? I really wonder if you could find here something or some program on MOSH which I could USE for this porposees or here if here are anyone who knows anything about these problems I now have because of INCOMPATIBILITY between LINUX x86 and NOKIA N73 in all kind of ways ,so please email me directly please..or please you NOKIA developwers give me something ???.I love my NOKIAN73 but I also love my COMPUTER with X86LINUX.....

SINCERELY:Tiina

Let's discuss this on the *Discussion* boards

Tiina,

Why don't you post such question on the discussion boards? Like maybe [[here](#)].
