

Talk:How_to_read_Location_from_Bluetooth_GPS

Very nice article. You might also want to mention the [Location API for Java™ Platform, Micro Edition \(Java? ME\) \(JSR-179\)](#).

[Ltomuta](#) 22:17, 25 November 2007 (EET)

Added info on JSR 179.

This is very good article in this they had explained about how to get the GPS data from the satellite and find the current location information this helpful to the developers who are making the tracking applications these are very secureable you might have seen that AP chief minister had died that is due to the loss of tracking system now a days Tracking applications are playing vital role in all areas

This application had explained clearly about how to get location data by using GPS its help full to both freshers and experienced developers also --[Narendrachinni](#) 05:03, 17 September 2009 (UTC)
