=====

Hi,

Am Hujefa Penwala from India, using Nokia 5700 bought from Dubai, i keep tracking new firmware updates for my cell, however i am still stuck with the older firmware :-

My product code - 0515740

V 03.83.1 22-06-07 RM-230 Nokia 5700 (21.01)

After several months firmware v04.21 has been launched which is not available through NSU, and now another firmware v5.11 has been launched which is still not available through NSU,

Whats the point in launching new firmware updates if its not available through NSU

Please make the firmware updates available through NSU as soon as possible

**Reviewer Approved**

I find that this article is very informative for all Nokia users because we can know what is the current version for our model. I would recommend to all my friends to this article. Hope that this article will be updated more frequently.

## Not for end-users

This page, as the entire site in fact, is intended for software developer's use. End-users should address their concerns regarding firmware updates to Nokia Care or the appropriate product support channel (i.e. operators, resellers, ...)

More at the [end-user discussion board](#).
