

## Talk:Nokia\_Sensor\_APIs

Sensors - a popular feature of modern devices. This article helps you to recognize which devices supports sensors and what kind of sensors currently exists in Nokia devices. Unfortunately there are a lot of difference in Nokia Sensor APIs for different platforms. Therefore it is necessary to clearly understand what platform you want to support in your application. Also in this article contains a list of popular applications which use sensors. These applications could help you to find an idea how to utilize sensors of the particular device.

FireSwarog, 18.09.2009

---

Reference information is needed for:

- the fact that N95, N93 and N82 have all the same sensor

N95 8GB with sensor return same values as 5500 between -300 and 300 for X,Y,Z axes. 1G=300  
Plugin for N95 return values between -64 and 64. 1G=64

Cyke64

- relevance in this context for N93i's digital zoom :)
- the fact that apps like RotateMe are going to be released (work on) other devices than N95. At least about one of the apps I know for sure that it has not been tested on all those devices.

sensor APIs

## accelerinvaders

Hello,

I think it's a better idea to point the accelerinvaders link to its collection:  
<http://mosh.nokia.com/collection/3746EC195CEE725DE040050AEE041508>

As I'm going to put there newer versions (there are two already)

See you later! Luis

---

Done. But next time do it yourself :)

## wattery screensaver

You can download it for free at psilocs site, you don't need to buy it. Is it okay if I change it to Download instead of Buy? If not, you can change it back ^^

Okay. No problem. [Cyke64](#)

## SAPI

Could you add some precisions about SAPI ? Only 5800 seems to support it ... Could you test if sensor framework is supported in others 3rd FP2 devices (N79,N85,N96) ? You could use SensEx test application for this. [Cyke64](#)

## Page about to move ...

Let's keep this page about Nokia specific Sensor APIs. I will change its name to "Nokia Sensor APIs" and remove references to S60's Sensor Framework.

An overview of the Sensor APIs, both from S60 and manufacturer specific, is available in the Sensor category page.

## About this article sensor APIs

This article gives information about the sensor chip which is being used in different nokia devices.

Also this article gives us the application developer list who have developed application in the field of sensor Sensor APIs.
