

Talk:Portal:Programming_Languages

--antonypranata 23:34, 19 April 2007 (UTC) I think we need a guideline what to write in this section. So far, most of the contents in this section is available in "How To" and "Code Examples" sections. I think we need to consolidate them. How about removing "Programming Languages" section completely and replace it with "Code Examples" and "How to's" sections? Anyone?
