

## TextBox

The following code creates a Text Box.

```
import javax.microedition.midlet.*;
import javax.microedition.lcdui.*;

public class TextBox_Example extends MIDlet
{
    Display display=Display.getDisplay(this);

    public void startApp()
    {
        //TextBox(title,text,size,constraints)
        TextBox textbox = new TextBox("Text Box Example",
                                     "This is an example of a TextBox",50,0);

        display.setCurrent(textbox);
    }
}
```
