Overview

The S60 mobile phone uses highlights as a graphical effect. Carbide.ui contains the following customizable highlight options:

List Highlight

This is the highlight that is used in, for example, the General highlight list.

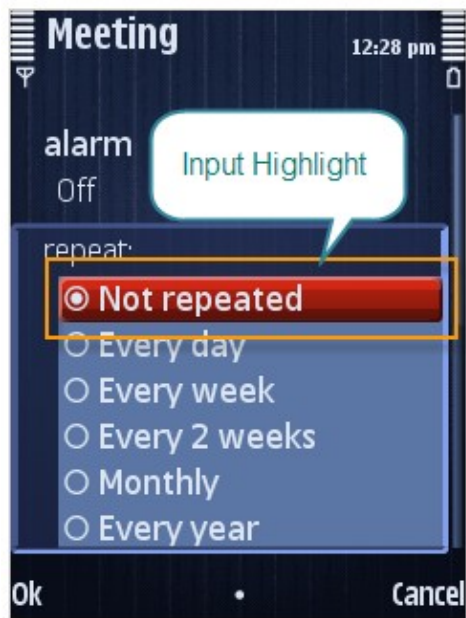

Grid Highlight

This is the highlight that is used in the Applications screen's grid.

Input Highlight

This is the highlight that is used, for example, in the Meeting screen's Repeat options.

All of the above components can be edited as a Single element or as nine piece element.
