

User:Olympio

Olympio Cipriano is a researcher associated with the Embedded Systems and Pervasive Computing Lab (<http://www.embedded.ufcg.edu.br>) at Federal University of Campina Grande, Brazil. He had obtained his MSc. in Electrical Engineer at the same university. In collaboration with INdT (<http://www.indt.org>) he had lectured Symbian/C++ programming courses and made presentations in many universities around the country. Among other interests, he likes to program in Symbian/C++ and Python.

The Embedded Systems and Pervasive Computing Lab that he makes part features the following projects:
